

Active Wound Summary

Patient Demographics

Name: Anthony A. King

DOB: 05/10/1957 (69 years old at time of charting)

Sex: Male

Weight: 229.3 lb (104.0 kg)

Facility: Stockton Regional Rehab Hospital

Admit date to rehab: 06/23/2026

Attending physician: Pratik Gandhi, DO

Five Active Wounds - Measurements and Source Documents

All wound measurements were documented on 07/01/2026 wound addendum forms. Nursing orders describe wound locations and dressings but do not include measurements.

#	Wound Site	Size (L x W)	Source Document	File Name
1	Right Back Traumatic, partial thickness, open	19 cm x 8 cm Area: 152 cm ²	Wound Addendum Site: Back Date: 07/01/2026	wound_addendum_back_62dd.pdf
2	Right Heel Pressure injury, DTI Fluid-filled blister	8 cm x 8 cm Area: 64 cm ²	Wound Addendum Site: Right Heel Date: 07/01/2026	wound_addendum_right_heel_d70b.pdf
3	Right 5th Toe Pressure injury, DTI Fluid-filled blister	2 cm x 2 cm Area: 4 cm ²	Wound Addendum Site: Right Foot (5th toe) Date: 07/01/2026	wound_addendum_right_foot.._9564.pdf
4	Right Dorsal-Lateral Foot Traumatic, partial thickness Open blister	8 cm x 4.5 cm Area: 36 cm ²	Wound Addendum Site: Right Foot (dorsal lateral) Date: 07/01/2026	wound_addendum_right_foot_c8b2.pdf
5	Left Plantar Foot Pressure injury, DTI Fluid-filled blister	8 cm x 9 cm Area: 72 cm ²	Wound Addendum Site: Left Foot Date: 07/01/2026	wound_addendum_left_foot_a9c2.pdf

Wound Clinical Notes

#	Wound	Clinical Notes
1	Right Back (19 cm x 8 cm)	Etiology: Traumatic. Wound bed: 10% granulation, 70% slough, 20% eschar. Treatment changed to Collagenase (Santyl) on 07/01/2026. Nursing order (no size): wound_care_1_79cf.pdf
2	Right Heel (8 cm x 8 cm)	Etiology: Pressure injury / DTI. Status 07/01/2026: Worsened, larger in size. Nursing order (no size): wound_care_5_9d02.pdf
3	Right 5th Toe (2 cm x 2 cm)	Etiology: Pressure injury / DTI. Status 07/01/2026: Worsened, decreased in size, discolored. Nursing order (no size): wound_care_3_e3ae.pdf

#	Wound	Clinical Notes
4	Right Dorsal-Lateral Foot (8 cm x 4.5 cm)	Etiology: Traumatic. Status 07/01/2026: Worsened, larger in size, increased drainage. Nursing order (no size): wound_care_4_dc4a.pdf
5	Left Plantar Foot (8 cm x 9 cm)	Etiology: Pressure injury / DTI. Status 07/01/2026: No change. Nursing order (no size): wound_care_2_ee6e.pdf

Supporting Documents Reviewed (No Wound Measurements)

File Name	Description
wound_referral_7d5f.pdf	Admission H&P - describes bilateral foot wounds and hospital course.
wound_care_consult_5175.pdf	Wound care consult order - evaluate multiple wounds.
wound_care_1_79cf.pdf	Nursing order - Right Back dressing (Collagenase).
wound_care_2_ee6e.pdf	Nursing order - Left Foot/plantar DTI blister.
wound_care_3_e3ae.pdf	Nursing order - Right 5th Toe DTI blister.
wound_care_4_dc4a.pdf	Nursing order - Right dorsal lateral foot open blister.
wound_care_5_9d02.pdf	Nursing order - Right heel fluid-filled blister.

Summary

Total documented open surface area across all five wounds: approximately 328 cm². Re-measure at clinic intake is recommended. Three wounds were documented as worsening on the 07/01/2026 addendum assessments.
