

Active Wound Summary

Patient Demographics

Name: Anthony A. King

DOB: 05/10/1957 (69 years old at time of charting)

Sex: Male

Weight: 229.3 lb (104.0 kg)

Facility: Stockton Regional Rehab Hospital

Admit date to rehab: 06/23/2026

Attending physician: Pratik Gandhi, DO

Five Active Wounds

Single-column mobile layout. All measurements from 07/01/2026 wound addendum forms.

Wound 1: Right Back

Type: Traumatic, partial thickness, open

Size: 19 cm x 8 cm (Area: 152 cm²)

Source Document: Wound Addendum - Site: Back - Date: 07/01/2026

File Name: wound_addendum_back_62dd.pdf

Notes: Etiology: Traumatic. Wound bed: 10% granulation, 70% slough, 20% eschar.

Treatment changed to Collagenase (Santyl) on 07/01/2026. Nursing order (no size): wound_care_1_79cf.pdf

Wound 2: Right Heel

Type: Pressure injury, DTI, fluid-filled blister

Size: 8 cm x 8 cm (Area: 64 cm²)

Source Document: Wound Addendum - Site: Right Heel - Date: 07/01/2026

File

Name:

wound_addendum_right_heel_d70b.pdf

Notes: Etiology: Pressure injury / DTI. Status 07/01/2026: Worsened, larger in size. Nursing order (no size): wound_care_5_9d02.pdf

Wound 3: Right 5th Toe

Type: Pressure injury, DTI, fluid-filled blister

Size: 2 cm x 2 cm (Area: 4 cm²)

Source Document: Wound Addendum - Site: Right Foot (5th toe) - Date: 07/01/2026

File

Name:

wound_addendum_right_foot._9564.pdf

Notes: Etiology: Pressure injury / DTI. Status 07/01/2026: Worsened, decreased in size, discolored. Nursing order (no size): wound_care_3_e3ae.pdf

Wound 4: Right Dorsal-Lateral Foot

Type: Traumatic, partial thickness, open blister

Size: 8 cm x 4.5 cm (Area: 36 cm²)

Source Document: Wound Addendum - Site: Right Foot (dorsal lateral) - Date: 07/01/2026

File

Name:

wound_addendum_right_foot_c8b2.pdf

Notes: Etiology: Traumatic. Status 07/01/2026: Worsened, larger in size, increased drainage. Nursing order (no size): wound_care_4_dc4a.pdf

Wound 5: Left Plantar Foot

Type: Pressure injury, DTI, fluid-filled blister

Size: 8 cm x 9 cm (Area: 72 cm²)

Source Document: Wound Addendum - Site: Left Foot - Date: 07/01/2026

File

Name:

wound_addendum_left_foot_a9c2.pdf
Notes: Etiology: Pressure injury / DTI. Status 07/01/2026: No change. Nursing order (no size): wound_care_2_ee6e.pdf

Supporting Documents (No Measurements)

wound_referral_7d5f.pdf
Admission H&P - describes bilateral foot wounds and hospital course.

wound_care_consult_5175.pdf
Wound care consult order - evaluate multiple wounds.

wound_care_1_79cf.pdf
Nursing order - Right Back dressing (Collagenase).

wound_care_2_ee6e.pdf
Nursing order - Left Foot/plantar DTI blister.

wound_care_3_e3ae.pdf
Nursing order - Right 5th Toe DTI blister.

wound_care_4_dc4a.pdf
Nursing order - Right dorsal lateral foot open blister.

wound_care_5_9d02.pdf
Nursing order - Right heel fluid-filled blister.

Summary

Total documented open surface area across all five wounds: approximately 328 cm2. Re-measure at clinic intake is recommended. Three wounds were documented as worsening on the 07/01/2026 addendum assessments.
